STEAM-CURING OF HIGH-STRENGTH CONCRETE (Proparivaniye Visokoprochnikh Betonov) tr. by G. L. Cairns, June 60 [9]p. DSIR Library Communi- cation no. 988. Order from OTS or SLA \$1.10                  61-13954			
Trans. of Beton i Zhelezobeton (USSR) 1959, no. 10, p. 442-446.			
DESCRIPTORS: *Concrete, *Steam, Temperature, Heat treatment, Mechanical properties.			
Investigations on the steam curing of high-strength con- crete made of stiff mixes with low water/cement ratios and Portland cements of high marks enabled the follow- ing conclusions to be drawn. When subjecting concretes to hydrothermal treatment, mixes should be selected with maximum stiffness and capable of compaction with the available equipment. Steam curing of stiff mixes with w/c ratios less than 0.4 at 60° to 80°C is more (Materials, TT, v. 6, no. 1)                  (over)
